

Demo on making a homemade gelatin plate in your kitchen

My kitchen usually looks like...

Recipe: Gelatin Plate

Two 6 ounce bottles of Glycerin (12 ounces total).

Seven (7) packets of Knox unflavored gelatin

One and a half cups of boiling water

One 8" by 8" pan with a smooth bottom.

Pour room temperature glycerin into a microwavable bowl.

Sprinkle gelatin into the glycerin and slowly stir.

Pour the boiling water into this mixture. Stir slowly.

Place in the microwave and give it an additional 45 seconds.

Pour into an 8" by 8" pan and allow it to set up on a level surface.

Let set overnight, room temperature

Release from the pan :pull the edges away from the sides with your fingers, Drop unto a clean plastic 8 1/2 by 11" acetate sheet and place another sheet over the top to store.

Two 6 ounce bottles of Glycerin (12 ounces total).

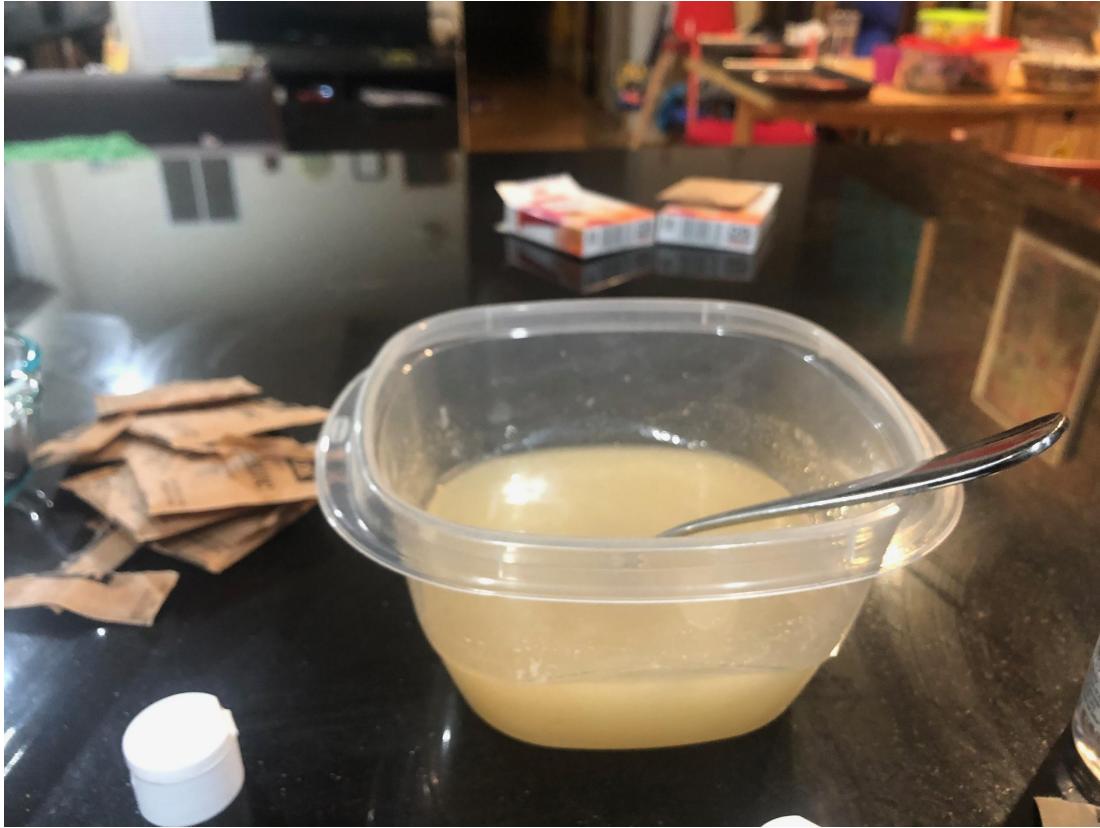

Seven (7) packets of Knox unflavored gelatin

1 8" x 8" pan with a smooth bottom

Mixing

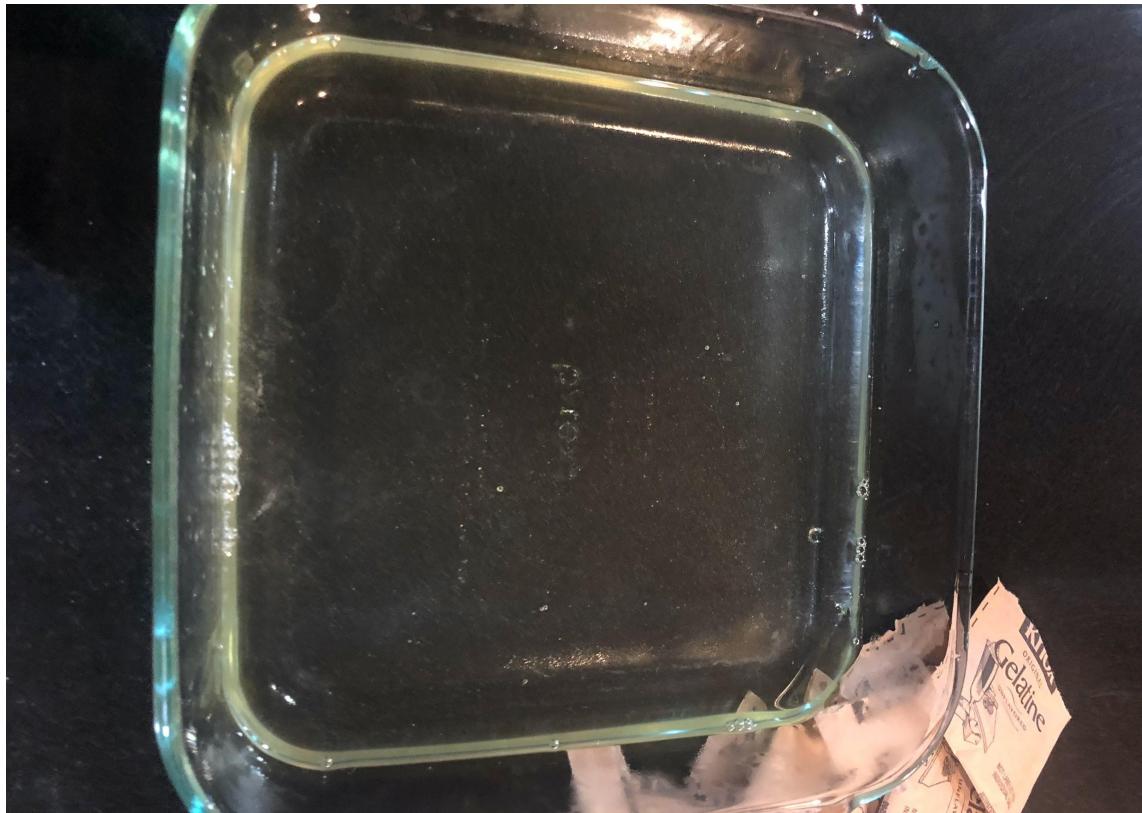

Boil 1 and $\frac{1}{2}$ cups of water

Mix boiling water into mixture in microwaveable bowl and microwave for 45 seconds. Pour mixture into pan. Let it set overnight in room temperature.

The next day!
